WORK EXPERIENCE

The Boeing Company - Saint Louis, Missouri
Programmer/Analyst
From December 2015 to Present

Starting at Boeing, I worked on a COTS product that managed various product lifcycles, mostly using C and C++. As of mid 2016 I have been a web developer for the Boeing Intranet. Currently my frequented tech stack includes Angular, Spring Framework, MySQL, and Cloud Foundry for Hosting

Dillard's Inc - Little Rock, Arkansas
Intern
From June 2013 to August 2013

My internship at Dillard's was mostly web development for the company's internal websites. I used basic css/html with jquery for most of the development but also was able to expirement with Go and Scala for backend tasks.

EDUCATION

University Of Arkansas - Fayeteville, Arkansas
Bachelor of Science in Computer Science
**From Fall 2010 to Spring 2015**

As a student at the university of Arkansas, I designed and implemented a smart home with proximity activated lights, a stock keeping refrigerator, and a smart stove top for my capstone project.

PERSONAL STATEMENT

I enjoy learning new technologies. I enjoy coding problems. I enjoy software development as a whole and everything that comes along with it. I'm lucky that my career so well intersects with one of my favorite hobbies and it's great whenever I can share my passion with like minded people.
