EDUCATION

University Of Arkansas - Fayeteville, Arkansas
Bachelor of Science in Computer Science
Fall 2010 to Spring 2015

- Designed and integrated a smart home with proximity activated lights, a stock keeping refrigerator, and a smart stove top for my capstone project.

INTERESTS

WORK EXPERIENCE

Mastercard - Saint Louis, Missouri
Senior Software Engineer (Frontend)
October 2019 to Present

- Developed receipt upload UI for expense management tool that is used by over 100 companies around the world

- Designed and implmented navigation web component for Smart Data application that recieves 60M monthly hits.

- Redesigned Smart Data login UI to improve responsitivity and provide a better experience on mobile platforms

- Created a reusable component library that was used across the organization that significantly cut down on code duplication and reuse.

- Shaped the way that Mastercard performed front end development by leading front end technical interviews, mentoring newer developers, and researching and implementing modern front end development practices.

- Introduced feature flagging to our applications which improved our development, testing, and time to market

Software Engineer (Backend)
March 2019 to October 2019

- Worked on Microservice APIs that provided consumer PII and PCI data to both internal and external costumers

The Boeing Company - Saint Louis, Missouri
Programmer/Analyst
December 2015 to March 2019

- Worked on developing integrations for a product lifecycle tool in C and C++

- Developed internal intranet site to manage Boeing's transition to a modern development insitution, providing developers information on modern day programming best practices

Dillard's Inc - Little Rock, Arkansas
Intern
June 2013 to August 2013

- Worked on the company's supplier portal, learning the foundational knowledge that would send me on the path of a career in web development
